

CAR AIR CLEANER AND IONIZER AV 600

STAY FRESH, SAFE AND ALERT AT THE WHEEL

The AIRONIC AV 600 is a compact, slimline air cleaner and ionizer, that once mounted in your vehicle will purify almost two cubic metres of air every sixty seconds. The result is the freshest, cleanest air on the road.

The latest generation AV 600 is specially designed to work in your car, truck or van. Just wind up your windows and switch it on to remove smog, exhaust smells, cigarette smoke, dust, pollens, bacteria and other particulate pollutants.

Now you can stay fresh and alert at the wheel, arriving more relaxed, and make your distance driving safer and much more pleasurable. Considering the amount of time we spend on the road, an Aironic is a very worthwhile added insurance.

The AV 600 balances the ion loss caused by air conditioning and also removes smells and odours to make the air fresh and healthy to breathe.

Aironic cleaners have been applauded by professional bus, truck, taxi and car

drivers who claim less accidents, better concentration and less stress.

The AV 600 features twin fan/whisper-quiet motor and a smooth, non-reflective finish that will compliment and protect the expensive interior decor of your car. Designed to sit on the rear window shelf, mount to the roof or side walls of your van or your truck.

The AV 600's heat resistant casing will ensure it always stays in shape and functions efficiently no matter how hot it gets.

The AV 600 is easy to install and comes with a panel mounted control switch which allows you to select the fan speeds without moving from your seat. The unit features filter timer for checking and replacement of filter.

Australian designed Aironic Air Cleaners are fully tested and come with a two year warranty. You can see and breathe the difference with Aironic.

*No chemicals or aromatic substances used.

AIRONIC

Products for Life

CLEAN FRESH AIR WHEREVER YOU GO

The AV 600 draws dirty air in through a replaceable filter cartridge and traps even the smallest pollution particle via a three stage filtration system.

Ion emitters then release negative ions into the clean outgoing air.

The result is a spontaneous clean, fresh and healthy airflow.

Stay fresh, safe and alert at the wheel with Aironic, Products for Life.

TECHNICAL SPECIFICATIONS

MODEL:	AV 600
DIMENSIONS:	525mmW x 176mmD X 100mmH
WEIGHT:	1.2 kg
INPUT:	12 volts DC
OUTPUT VOLTAGE:	7.0 kv DC nominal (ionization)
IDEAL VOLUME:	2.5 m ³ (large car) cab space
ION OUTPUT:	1,000,000 ions/cc @ 1m
EMITTER CONFIGURATION:	2 needles on each of 2 outlets
FANS:	2 x 12 volt, 3 speed centrifugal with involute
CLEAN AIR OUTLETS:	2 swivel outlets individually adjustable
CONTROL MODES:	1) Fan/Ioniser : ON, 1-2-3 SPEED, OFF, FILTER, TIMER RESET 2) Panel mounted selector switch operable from Driver's seat
FILTRATION:	3 stage
FILTER TYPE:	Pre-filter, Electrostatic Filter Media & Activated carbon
FILTER SIZE:	0.049m ²
FILTER EFFICIENCY:	99% @ 1 micron, 93% @ 0.3 micron
FILTER LIFE:	Up to 7 months depending on pollution levels and climate
CASING:	High heat resistant cycaloy
MOTOR CAPACITY:	98m ³ /hr
REPLACEMENT PARTS:	Filter Cartridge: AVF 600 DC Power Cord: AVP 600 Emitter Needles: EP4

Specifications subject to change without notice.
